High School Notes

Month after month and year after year, the school continues to grow better. This statement is verified in the fact that after Christmas we are going to give a Commercial Business Course to those desiring to take it. It is intended more for the graduating classes than any one else as it fits them better to enter University, or if instead, they expect to begin a business life without the University course, a handsome salary is at their command.

Prof. Stunkard had a letter not long ago from a business concern asking for some young men and women who were prepared to fill responsible positions with salaries ranging from \$100 to \$200 per month. Our aim is to put a business education within the reach of all. When the High School was established it was to have a business course in connection but all could not be done at once; improvement must come gradually. We thank you for your ready to establish a department and a young man from Louisville will have charge of the work. This not only speaks for the school as a whole but it makes it possible for Lawrenceburg County students to acquire a business education at home. When a class of students finish the High School course they are also prepared to fill responsible positions and command handsome salaries, so let's join hands in making this a success, for there is a great demand for young men and women for such positions.
